ABOUT ME

As a developer, I have been involved in freelance projects since 2013. However, in 2018, my professional journey took a significant turn as I began working on various projects, and I've been continuously engaged in challenging and diverse projects ever since.

My expertise lies in technologies such as PHP, Laravel, Symfony, Node.js, NestJS, Java, React, and Vue. Despite my focus on these, I possess diverse knowledge and hands-on experience with various languages and technologies. I work extensively with Cloud and Container technologies, and I'm well-versed in mobile stacks like Flutter and React-Native.

WORK EXPERIENCE

Senior Software Engineer

Fidelizarte [06/2023 – Current]

City: Lisbon

Country: Portugal

As a web/mobile developer, I create web systems and apps for clients using technologies like PHP, Laravel, Node.js, MySQL, JavaScript, jQuery, Angular/Ionic, React and Vue.js. I handle full-cycle application development, including testing and deployment. I also have experience in customer interaction to ensure their needs are met.

Senior Software Engineer

Comuniverse [08/2022 – 01/2024]

City: São Paulo

Country: Brazil

As a full-stack developer, I played a key role in developing, refactoring, and managing projects in education, video streaming, and more. My expertise spans PHP, Laravel, JavaScript/TypeScript, Node.js, React.js, AWS, and Docker. I've also worked with Vue.js/ Nuxt.js, Nest.js, and React Native in an Agile team using Scrum/Kanban methodologies. Our applications reached thousands of users, serving various purposes. I continuously delivered high-quality solutions, meeting evolving user demands.

Software Engineer

PrimeIT - SPMS [09/2022 – 01/2023]

City: Porto

Country: Portugal

As a full-stack developer at SNS/SPMS, I played a crucial role in developing applications for the PEM (Prescrição Eletrónica de Medicamentos / Electronic Prescription of Medicines) project, aimed at modernizing Portugal's healthcare system. In this position, I utilized a range of technologies, including Java, Spring/Spring Boot, JavaScript, JQuery, and Liferay. Working within an Agile team using Scrum, I contributed to building an application that serves the entire National Health system. My dedication to this project has been driven by a passion for improving healthcare services in the country.

Software Engineer

PrimeIT - NEX [04/2022 – 08/2022]

City: Porto

Country: Portugal

As a versatile developer, I handled both backend and frontend tasks, making improvements and adding new features to the company's products. My tech stack included HTML, CSS, JavaScript, JQuery, PHP (Zend Framework/Laminas), MySQL, and AWS, with some Laravel implementations. Applying agile methodologies and advanced development principles like SOLID and Clean Code, our SaaS products became essential tools for thousands of companies.

Product Support Engineer

PrimeIT - Mobbilleum [01/2022 – 04/2022]

City: Porto

Country: Portugal

As a Product Support Engineer at Mobbilleum, I provided L3 support and conducted developments for the RAID product. I worked with JavaScript/JQuery, Java, Spring, Oracle Database/PL-SQL, and PostgreSQL technologies. My focus was on maintaining the product, supporting users worldwide, and optimizing performance. RAID is widely used in the Telecommunications sector by thousands of companies globally. I am passionate about delivering quality service and contributing to cutting-edge advancements in the industry. Let's connect to explore potential opportunities for collaboration.

Software Engineer

Federal University of Alagoas (UFAL) [01/2019 – 12/2021]

City: Maceió-AL

Country: Brazil

As a part of the University's IT Sector, our primary focus was to develop and support internal applications/systems. We employed a versatile tech stack, utilizing Java (Spring/Spring Boot), PHP (Laravel and Symfony), and Node.js for backend development, while employing React.js, Angular, and jQuery for frontend development. Our databases included SQL (Oracle DB, MySQL, PostgreSQL) and NoSQL (MongoDB). Additional technologies like Docker, Typescript, GCP, SOLID, Scrum/Kanban, Git, and GitHub were also part of our toolkit. The systems we supported were crucial to thousands of students, teachers, and employees, ensuring continuous online availability and seamless performance.

System/Network Administrator

Federal University of Alagoas (UFAL) [06/2018 – 01/2019]

City: Maceió-AL

Country: Brazil

As a dedicated IT professional at the University, my responsibilities encompassed maintaining the University Network in optimal condition. This involved configuring and updating equipment, as well as efficiently managing network traffic. I was also responsible for ensuring the smooth operation of the SQL database (MySQL) and continuously enhancing functionalities in various systems and software like Zabbix, GLPI, and the internal Wiki site, utilizing HTML, CSS, JavaScript, and PHP.

Additionally, I played a crucial role in managing both Linux and Windows servers, ensuring their seamless functionality. To streamline network services, I utilized Bash scripts. Moreover, I utilized Git and GitHub to maintain version control and facilitate collaborative development. Through my expertise and dedication, I ensured the University's IT infrastructure operated smoothly, contributing to the institution's success in delivering excellent services to students, faculty, and staff.

EDUCATION AND TRAINING

Full-Stack Developer

FLAG [11/2021 – Current]

Address: Rua Dr. Ricardo Jorge, 139, 4050-392 Porto (Portugal)
